

## Week 11 Highlights

The weekly influenza watch summarizes the flu activity in the City of Cleveland. The metrics in this report include the number and percentage of emergency department visits for influenza-like illness, confirmed flu hospitalizations, and deaths each week due to pneumonia or influenza.

- This week, flu activity is classified as “Low”
- 1.82% of emergency department visits were for flu-like illness
- There were 13 confirmed cases of influenza-associated hospitalizations reported this week. There have been 375 influenza associated hospitalizations so far this season
- 7.41% of deaths reported were due to pneumonia. Three influenza deaths were reported this week and there have been 17 influenza deaths so far this season

### Flu Intensity: Low

Influenza & COVID-19 Intensity Indicators	This Week n (%)	Activity Compared to Last Week	Season Total n (%)
Emergency Department visits for Influenza-like Illnesses	68 (1.82%)	-0.41%	1,890 (1.95%)
Confirmed Influenza Hospitalizations	13	-22	375
Confirmed COVID-19 Hospitalizations	2	-1	182
Pneumonia- & Influenza-related Deaths	22 (7.41%)	+1.51%	404 (5.52%)

*\*Deaths represent all deaths for Cuyahoga County. All other data presented are City of Cleveland-specific. Data are preliminary and subject to change as more information is gained. The three indicators for calculating the intensity thresholds are based on 2017 methodology from the Centers for Disease Control and Prevention.*

## Influenza-like Illnesses (ILI)

Percentage of Emergency Department visits for ILI by Week, 2023-2024

The proportion of Emergency Room visits for influenza-like illnesses is under the low threshold and comparable to the 5-years average. This week, 57% of the visits were among females. Regarding race and ethnicity, 35% of visits were Black or African American individuals; 12% were among White individuals; and 53% of visits were among other racial groups. A little over than third (38%) of visits were among Hispanic or Latin individuals. The median age this week is 8 years.

*\*Data Source: Health Monitoring Systems: EpiCenter 3.5.18. Data extracted on 3/21/2024.*

*Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons*

# Influenza and COVID-19 Hospitalizations

Number of Flu and COVID-19 Hospitalizations by Week, 2023-2024

There have been 13 influenza-associated Hospitalizations (IAH) reported this week among individuals aged 8 to 80 years. More than half of these hospitalizations were among residents above the age of 35. This is comparable to the previous week and lower than expected at this point in the year based on the 5-year average. This brings the total influenza-associated hospitalizations for the season to 375. Influenza has accounted for more hospitalizations than COVID-19 this fall. The number of COVID-19 hospitalizations has decrease from the previous week, with 2 hospitalizations reported during the current week.

*\*Data Source: Ohio Department of Health: Ohio Disease Reporting System. Data extracted on 3/21/2024. Data are preliminary and subject to change as more information is gained. Low, Moderate, and High intensity thresholds are defined as the 50%, 90%, and 99% Confidence Intervals, respectively, based on the 5-Year Average of previous seasons.*

## Pneumonia- & Influenza -Associated Deaths\*

Percentage of Deaths due to Pneumonia or Influenza by Week, 2023-2024

There have been 22 deaths this reporting week due to pneumonia or influenza-related illnesses (P&I). The proportion of P&I deaths is above the very high threshold this week. This week, the data shows there were three influenza-associated deaths, which brings the season total to 17. Also, there have been 11 COVID-19 associated deaths thus far in the same period. The majority P&I deaths that occurred this week were among individuals aged 25 years and older.
